SUMMARY

B.Tech CSE student with strong foundations in Data Structures, Algorithms, and Object-Oriented Programming, experienced in building scalable full-stack applications and backend systems. Passionate about solving real-world problems using technology and interested in applying software engineering in financial services and large-scale systems.

WORK EXPERIENCE

Summer Research Intern – SRM University-AP

Jun 2025 – Jul 2025

- Built end-to-end ML system using Gradient Boosting to predict credit scores from 50,000+ financial records.
- Deployed interactive Streamlit dashboard with 100ms inference time for real-time decision support.
- Designed modular pipeline (ingestion → features → training → serialization) for production reliability.

Core Team Member – Google Developer Groups (GDG)

Aug 2025 – Present

- Tracked registration data across 6 events (800+ attendees) using Excel, improving outreach by 35%.
- Increased participant engagement by 30% through coordinated workshops across 4 technical sessions.
- Led campaigns reaching 3,500+ students, increasing community participation by 40%.

PROJECTS

Crop Disease Classification

[GitHub](#)

Python, TensorFlow, Flask, Computer Vision

- Built production-ready CNN (MobileNetV2) achieving 96.5% accuracy across 38 disease classes.
- Deployed Flask API with 1.2-second inference time, tested on 500+ sample images by users.
- Reduced diagnosis time from 2-3 days to under 2 seconds, directly impacting user outcomes.

AI-Based Peer Behavior Similarity Detector

[GitHub](#)

Python, Scikit-learn, Pandas, Streamlit

- Built AI-powered anomaly detection system analyzing 8,000+ user records with 92% precision.
- Designed composite scoring system with 6 similarity metrics, improving detection rate by 18%.
- Created interactive Streamlit dashboard used by 15+ peers, reducing analysis time from 2 hours to 10 minutes.

Collaborative Class – Academic Collaboration Platform

[GitHub](#)

React.js, Node.js, MongoDB, Socket.IO

- Built full-stack role-based platform (React.js + Node.js + MongoDB) supporting 200+ active users.
- Developed real-time notifications using Socket.IO and analytics dashboards tracking 10+ metrics.
- Reduced assignment monitoring time by 50% through automated workflows.

EDUCATION

B.Tech (CSE) at **SRM University AP** (CGPA: 8.83/10.0)

2023 - present

Class 12th CBSE Board [Cambridge Senior Sec. School, Buxar (Bihar)]

2022

Class 10th CBSE Board [Foundation School Buxar (Bihar)]

2020

SKILLS

Core CS	Data Structures & Algorithms, Object-Oriented Programming, Operating Systems
Languages	Python, JavaScript, C, C++, Java, SQL
Web Technologies	React.js, Node.js, Express.js, HTML, CSS, Tailwind CSS, Bootstrap
Backend & APIs	Flask, FastAPI, REST API Development, API Integration, Authentication (Basic/JWT)
Databases	MongoDB, MySQL
Machine Learning	Scikit-learn, TensorFlow, PyTorch, Regression, Gradient Boosting, CNNs, Transfer Learning, Classification
Data Science & Analytics	Pandas, NumPy, Data Preprocessing, Feature Engineering, Data Cleaning, Model Evaluation, Data Visualization
Tools & Platforms	Git, GitHub, Docker, REST APIs, Postman, Streamlit, Jupyter, VS Code
Generative AI	Prompt Engineering, LLM Basics, RAG (Basic), LLM API Integration

CERTIFICATIONS

• **Oracle Cloud Infrastructure 2025 Certified Data Science Professional** – Oracle (2025)

[Link](#)

• **Oracle Certified Professional: Java SE 17 Developer** – Oracle (2026)

[Link](#)

• **MongoDB Certified Associate Developer (Node.js)** – MongoDB (2026)
